

GRI LABS
CLIA #29D2093280
COLA #26294

Letter of Intent (LOI)

GRI Labs is a CLIA certified and COLA accredited high complexity medical diagnostic lab that provides a wide menu of state-of-the-art tests. Our testing services provide definitive and comprehensive results treating and diagnosing health issues. Capabilities include the gold standard for molecular PCR testing including respiratory and Covid-19, urinary, and STD testing, toxicology screening and confirmation, pharmacogenomics, and blood (serology) testing including Covid-19 antibodies. We also offer test menus tailored to the needs of women's and senior health providers.

At GRI Labs, we proudly strive to be the most reliable, accurate, trustworthy, professional diagnostic laboratory in the industry. Our mission is to bring together the best quality of health care outcomes for patients in the most cost-effective way. We continue to expand and work with an ever-growing range of health care plans.

GRI Gold Standard Testing

GRI's comprehensive testing services are designed to meet the laboratory diagnostic healthcare needs of medical providers, patients, senior and assisted living facilities, and schools utilizing PCR testing, COVID-19 testing, serology and toxicology with mass spectrometry.
